# VERIFY CREDENTIAL

Every Quantum Sequrity Academy credential is signed with a hybrid post-quantum signature (Ed25519 + ML-DSA-65). The check below runs against the issuer of record, Quantum Sequrity, and the signature can be re-verified by anyone, independently.

---

## VALID CREDENTIAL

This credential is genuine, not revoked, and within its validity period. The hybrid post-quantum signature checks out.

## Nicholas Soh Zen Ren

Fundamental

FUNDAMENTAL LEVEL

A plain-language introduction to the quantum threat and the post-quantum response.

CREDENTIAL ID

QNSQY-PQC-FND-16A4F4

COMPETENCIES DEMONSTRATED · CRYPTOGRAPHICALLY SIGNED

- ✓ Explain symmetric vs asymmetric encryption
- ✓ Describe how Shor & Grover threaten crypto
- ✓ Define Harvest-Now-Decrypt-Later & Q-Day
- ✓ Name the 3 PQC families & NIST standards

QNSQY Issued by **Quantum Sequrity**, the post-quantum cryptography tool. This credential attests completion of a Quantum Sequrity Academy course.

## CRYPTOGRAPHIC PROOF

This credential is signed with a hybrid post-quantum signature: a classical Ed25519 signature and a post-quantum ML-DSA-65 (FIPS 204) signature over the exact same canonical payload. An adversary would have to break both to forge it. The signed payload, both signatures, and the published public keys are shown below, so anyone can re-verify the signatures offline against the keys without trusting this page.
